Dear Local Stakeholder,

As outlined in our October 2026 newsletter, overnight working was originally planned for this week to facilitate the UKPN cable diversion works on Badsell Road.

Since the newsletter was produced and distributed, Breheny and Kent County Council have continued to review the programme and identify opportunities to optimise the works and minimise disruption to the local community. Following this review, we have been able to refine our programme and carry out these works during the day instead. In addition to the temporary 3-way traffic lights, lane closures on Maidstone Road will be necessary at certain times but these will be off-peak, between 09:30 and 15:30.

As a result, the planned night-time working will no longer be required this week.

As sections of the works are completed, we will look to reduce the traffic management in place wherever possible, helping to minimise disruption further. We appreciate residents' patience and understanding as we continue to refine our approach and deliver these essential works.

Kind Regards,

Emma Bates
Public Liaison Officer
Breheny Civil Engineering
