Dear Local Resident/Stakeholder,

Following our previous notice regarding the emergency closure of Maidstone Road (B2160) due to a leaking water main, we can confirm that the affected section near the Esso petrol station has now reopened.

Please continue to follow the signed diversion route, which will remain unchanged until the road reopens. Weather permitting, we anticipate reopening by the end of the working day on Friday 30th October. We will provide a further update on Thursday if there are any changes to these arrangements.

The diversion route originally introduced at the start of the closure will remain in place to allow us to complete the delayed surfacing works alongside other planned activities during the remaining closure period. Residents will continue to be able to access Mascalls Park via Maidstone Road (B2160).

Thank you for your patience and understanding. If you have any questions, please contact me using the details below. Further project information is available at www.badsellroad.co.uk.

Kind Regards,

Emma Bates
